

Richard Webby, PhD. Dr. Webby is a member of Saint Jude Children's Research Hospital Faculty and is the Director, World Health Organization (WHO) Collaborating Centre for Studies on the Ecology of Influenza in Animals and Birds. Dr. Webby has shaped our understanding of influenza and viral transmission not just at St. Jude, but around the world. As Director of the WHO Collaborating Center for Studies on the Ecology of Influenza, Dr. Webby is a key player on the international stage shaping our understanding of virus pathogenicity and managing our response to outbreaks. From his home in New Zealand, Dr. Webby came to St. Jude as a postdoc fellow under the famed Dr. Robert Webster studying a group of viruses that would become the 2009 swine flu pandemic. He was promoted to faculty with the emergence of the avian influenza viruses in Asia and continues his storied career focused on influenza and pandemic preparedness.
